Drawings

The informal drawings filed 8/17/2000 are objected to under 37 CFR 1.84 for the following reasons: the lines, numbers and letters are not uniformly thick and well defined; numbers, letters and reference characters must be at least 32 cm (1/8 inch) in height; and the scale is not large enough to show mechanism without crowding when drawing is reduced in size to two-thirds in reproduction. Corrected formal drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Patentability seen in, although not limited to independent claim 26: the combination of elements specifically claimed including the features of promoting literacy and reading by conducting a competition related to a literary work in association with an advertisement. The examiner agrees with applicant's arguments (See Appeal Brief filed 4/3/2007, pages 12-24). It would not be obvious to one of ordinary skill in the art to combine the lottery game described in Hopkins (US 4,756,533) with the puzzle book described in Pritchard (US 1,217,632) to arrive at applicant's claimed method of promoting literacy. The closest prior art of record does not teach or fairly suggest the claimed features in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
